Project Acknowledge

eProject is a step-by-step learning environment that closely simulates the classroom and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to

- Practice step by step i.e. ladder approach.
- Build a larger more robust application.
- Usage of certain utilities in applications designed by user.
- Single program to unified code leading to a complete application.
- Learn implementation of concepts in a phased manner.
- Enhance skills and add value.
- Work on real life projects.
- Give a real-life scenario and help to create applications more complicated and useful.
- Mentoring through email support.

Project Objectives

The Objective of this program is to give a sample project to work on real life projects. These applications help you build a larger more robust application.

The objective is not to teach you HTML/JavaScript/Dreamweaver/HTML5 but to provide you with a real-life scenario and help you create basic applications using the tools.

You can revise the chapters before you start with the project.

This project is meant for students who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

It is very essential that a student has a clear understanding of the subject. Students should go through the project and solve the assignments as per requirements given.

Kindly get back to eProjects Team in case of any doubts regarding the application or its objectives.

Synopsis

Incorporating storage into a home is very much necessary. Staying organized is not easy, and allowing a buyer to understand the value of efficient storage solutions can make the difference between a haphazard home and an orderly masterpiece.

“Smart Store” is a company selling wardrobe and other home storage products specially space savers. They sell variety of products suiting every requirement and various sizes and qualities.

You are supposed to create a website for them with the below mentioned requirement specifications.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Design Plan: Smart Store	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 09/07/2020	Version: 1.0	Page No: 6/20

Problem Definition:

“Smart Store” is a company selling wardrobe and other home storage products specially space savers. They sell variety of products suiting every requirement and various sizes and qualities.

A website is supposed to be created with the below mentioned requirement specific website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Functional Descriptions

1/ The Home Page should be created making use of Sections with a suitable logo, the header section can be added which will show images of various storage solution product images.

2/ The site must contain the links to navigate through any category for the information.

3/ The site should display a menu which will contain the options for brief introduction about the various products available, location of the shop and any other information if required.

4/ The information should be categorized according to the brand names of the products like if a User wants to see only “star” products or any other company products then he/she can click on a Link/button/menu etc and can see only that Brand products.

5/ When a user selects any particular brand, a list of products for that brand will be displayed

Design Plan: Smart Store	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 09/07/2020	Version: 1.0	Page No: 7/20

6/ A brief summary of features of the products should be displayed on the Web Page along with the picture but detailed Features should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.

7/ The user should also be able to compare the various products of different as well as similar brands.

8/ There should be a “Contact Us” page which will have the Address of the Company which should be displayed using GeoLocation API (eg. GoogleMaps) and the email address which when clicked will invoke the local mail client from where they can send an email.

Customer Requirement Specifications

Customer: Smart Store

Project Objective:

- Design a helpful website which provide clients with necessary information about Smart Store, as well as the products.

Webmasters:

Input:

- Provide brief information of the products: prices, sizes, brands...
- List out store's locations. - Create a way for clients to compare a product with the other ones
- Show detailed information of each product to the customers.
- Provide clients with methods to contact and contribute feedbacks. Output:
- Display list of products with brief information about their prices, sizes, brands...
- Display stores' addresses, phone-numbers, emails, and location on Google Map.
- Create a link for each product for customers to download to learn about a product's details
- Allow customers to click 2 or more products to compare them
- Create a page for customers to provide feedbacks

Design Plan: Smart Store	Document Name: Customer Requirement Specifications	SWD/Form No.02/CRS/Ver1.0
Effective Date: 09/07/2020	Version: 1.0	Page No: 9/20

Users:

Input:

- Provide webmasters with feedbacks to improve the website.

Output:

- Succeed in providing webmasters with feedbacks.
- Learn more about the products and their brief summary.
- Know how to contact the company through its address, email, and phone numbers.
- Know about the stores' locations.

Hardware / software requirement:

Hardware:

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better

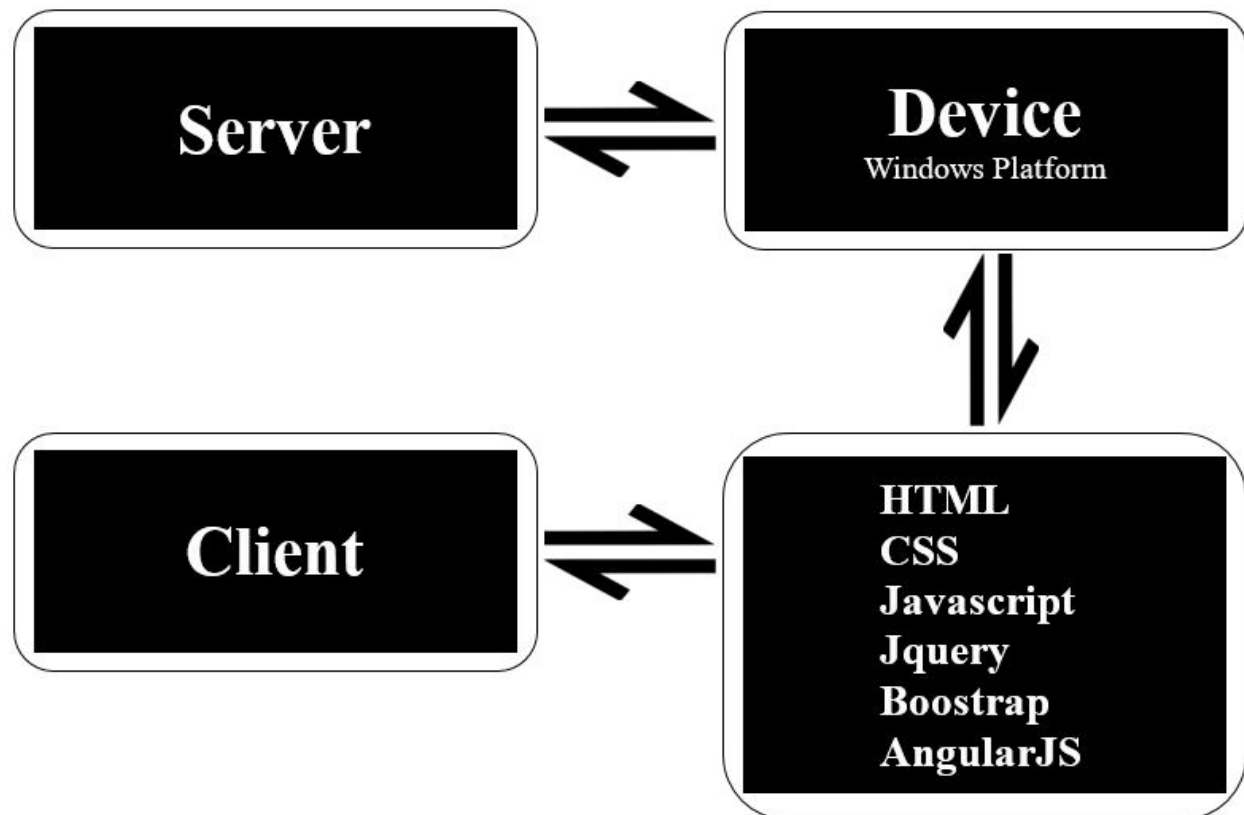

Software:

- Notepad/HTML editor
- Dreamweaver
- IE 5.0/ Netscape 6.0

Design Plan: Smart Store	Document Name: Final Checklist	SWD/Form No.07/FC/Ver1.0
Effective Date: 09/07/2020	Version: 1.0	Page No: 18/20

Final Checklist:

S.No.	Aspect Tested	Suggestions/Remarks
1.	Have all the modules been properly integrated and are they completely functional?	✓
2.	Does each unit meet its objective and purpose? Are all the validations happening as specified in Process Design?	✓
3.	Have all Design and Coding standards been followed and implemented?	✓
4.	Is the GUI design consistent all over?	✓
5.	Does the application's functionality resolve the client problem, and satisfy his needs completely?	✓
6.	Have the hardware and software been correctly chosen?	✓
7.	Additional features and utilities that give value addition to the entire project.	✓
